- Reporting includes:
 - Sales by Customer
 - Sales by Brand
 - Consolidated Sales by multiple licensees
 - Purchases by Vendor

Module Overview

Our Licensing/Royalty Management Module is a platform to compile, manage, analyze and test all aspects of your licensing program. Easily initiate an on-line repository for each of your licensees to store all agreements, contacts, statements and other licensee data. Upload, report and analyze licensee sales/purchase data submissions with our flexible reporting and dashboard. Design and store audit tests, execute licensee audit projects and track all issues to final settlement. The Licensing/Royalty Management Module helps you take your licensing program to the next level for the benefit of your company and your licensees.

The Licensing/Royalty Management Module allows you to:

- Analyze and categorize licensee sales/purchases by brand and Licensee customer (e.g., full-price vs. off-price).
- Identify new customers for review and approval.
- Review sales trends.
- Analyze sales by customer (e.g., major department store) consolidated across licensees.
- Create licensee audit projects and define and assign audit tests as tasks to preparer and reviewer which creates on-line audit status tracking.
- Store all important documents/reports securely on-line.
- Create royalty billing invoices and post payments to these invoices.
- Generate reports using a flexible user interface.
